Introduction/Interviewer Instructions

Greetings! I hope everyone that is reading this is having a really good day. By the way, I'm John Daniel S. Mojica, a Technology Consultant from TechVision Consulting Inc. TechVision Consulting Inc., has been hired by your company, the Manila Manufacturing Corporation (MMC). Your company is aiming to modernize your operations, improve efficiency, and remain competitive. So that's why I am here, as an interviewer to personally guide you through. This comprehensive interview will help us to guide you and your company. In addition, the purpose of this interview is to gather data information about MMC's current state, technology awareness, challenges, readiness, skills, budget, and implementation capacity before adopting emerging technologies. Our objective is to gather consistent and practical information from key stakeholders, so the consultant team can evaluate technology opportunities that your company can adopt.

Interviewee Information

Field	Response
Interviewee Full Name:	
Job Title / Position in MMC:	
Department / Division:	
Years of Tenure at MMC:	
Interview Date & Time:	
Interviewer Full Name:

1. As of now, what are MMC's main business and operational activities? Including the processes on how you produce consumer goods?

Probe: As you mentioned, which processes have the greatest impact on the company or the most critical?

2. As of now, what are the biggest challenges that your company has experienced?

Probe: Can you give me an example and its effect on the company?

3. Does your company collect and use data from customers to support and improve your operations? Yes or no, explain?
4. As of now, what parts of your company are currently automated, digitalized, and computerized?

Probe: In these parts, what works well, and what parts are still required to do in a manual way?

Notes/Response:

Notes:

Response:

Technology Awareness and Readiness

5. How would you rate or in your rating, 5 is the highest, and 1 for the lowest, do you think that your company is aware of and ready to adopt emerging technologies?

6. A follow-up question: What emerging technologies is your company currently aware of considering modernizing? Augmented reality, artificial intelligence, machine learning, and/or quantum computers?

Probe: Why do you consider these emerging technologies?

7. What benefits do you expect or think emerging technologies could provide to your company?

Probe: As you mentioned, which benefit is the highest priority for your company?

8. On the other hand, what concerns or risks do you expect or think might prevent your company from adopting emerging technologies?

Probe: Can you elaborate on the concerns or risks?

9. How does your company evaluate whether emerging technologies are worth adopting?

Probe: Can you elaborate on what criteria are most important?

Notes/Response:

Notes:

Response:

Industry and Competitive Analysis

10. What do you think about how emerging technologies are changing manufacturing?

Probe: Which emerging technology seems most relevant to your company?

11. Are you aware that your competitors or similar companies have adapted to emerging technologies? Yes or no; explain.

Probe: As you mentioned, which processes have the greatest impact on the company or are the most critical?

12. As of now, do you see opportunities for your company to modernize operations, improve efficiency, and remain competitive through emerging technologies?

Probe: Can you identify the specific process?

13. If you are a customer, what do you expect now that MMC has adopted emerging technologies to modernize its operations?

Probe: How soon do you expect these changes to matter?

Notes/Response:

Notes:

Response:

Specific Technology Areas

14. How could Artificial Intelligence and its ability to simulate human intelligence processes be useful at your company?

Probe: What problem would or may it solve?

15. Could the internet of Things (IoT) including connected sensors and devices be useful for monitoring machines, production conditions, inventory, etc?

Probe: If yes, can you elaborate what information you would want to monitor in real time?

16. A follow-up question: can you specify what physical equipment or objects at your company could connect through the IoT?

Probe: Can you elaborate further?

17. Just like question 14, AI, how could Augmented Reality help your company employees while they perform work?

Probe: Could the AR support real-time information? How?

18. Can you identify what systems or data that could benefit from the idea of cloud computing services?

Notes/Response:

Notes:

Response:

Skills and Capacity

19. What technical skills are currently available to your company employees that could support the adoption of emerging technologies?

Probe: Which skills are strong, and which is the most important?

Photo Documentation (AI Checker result and Grammarly result)

The image displays a series of eight screenshots arranged in a 4x2 grid, showing the results of AI detection (Scribbr) and grammar checking (Grammarly) for a document titled "Emerging Technologies Guide".

Row 1:

- Scribbr:** The document is 137 words long. The AI detector flags text that may be AI-generated. The overall score is 55.
- Grammarly:** The document is 127 words long. The overall score is 55. The writing quality is 55. The document contains several grammar and punctuation errors.

Row 2:

- Scribbr:** The document is 79 words long. The AI detector flags text that may be AI-generated. The overall score is 92.
- Grammarly:** The document is 79 words long. The overall score is 92. The writing quality is 92. The document contains several grammar and punctuation errors.

Row 3:

- Scribbr:** The document is 88 words long. The AI detector flags text that may be AI-generated. The overall score is 89.
- Grammarly:** The document is 88 words long. The overall score is 89. The writing quality is 89. The document contains several grammar and punctuation errors.

Row 4:

- Scribbr:** The document is 47 words long. The AI detector flags text that may be AI-generated. The overall score is 79.
- Grammarly:** The document is 47 words long. The overall score is 79. The writing quality is 79. The document contains several grammar and punctuation errors.
